JEW/JEV Series

Pneumatic Actuator

Overview

JEW / JEV Series pneumatic actuators are engineered for automated valve control applications requiring precision, durability, and international compatibility. Designed with an advanced rack-and-pinion mechanism, the actuators deliver stable torque output, accurate positioning, and long service life under high-cycle operations.

The series fully complies with global mounting and interface standards including ISO 5211, DIN 3337, and VDI / VDE 3845, ensuring seamless integration with quarter-turn valves, solenoid valves, switch boxes, and other NAMUR accessories. This standardized platform enables fast installation, interchangeability, and reduced system downtime.

Manufactured under ISO 9001 quality management procedures, each actuator undergoes functional testing and inspection to ensure performance reliability and traceability. The corrosion-protected extruded aluminum body, precision gearing, and multi-bearing guidance system support operation across a pressure range of 2.5 to 8 bar. Optional seals and stainless-steel shafts allow use in extreme temperature or corrosive environments.

Product Features

1. High-Reliability Structural Design

- Blowout-proof pinion shaft
- Multi-bearing and guiding support
- High cycle life construction

2. Precision Rack & Pinion Transmission

- High-precision machined tooth profile
- Low Backlash
- High torque output efficiency

3. Dual Piston Symmetrical Design

- Compact dimensional design
- Balanced torque output
- On-site reverse rotation capability
- Enhanced installation flexibility

4. Modular Spring Cartridge System

- Pre-compressed spring cartridges
- Rapid assembly / replacement
- Multiple torque level options
- Improved safety and corrosion resistance

5. Extruded Aluminum Body with Protection

- Internal and external anti-corrosion treatment
- Precision honed cylinder bore
- Low friction coefficient
- Extended seal life

6. International Mounting Compliance

Full compliance with:

- ISO 5211
- DIN 3337
- VDI / VDE 3845

Advantages:

- Rapid valve mounting
- Direct mounting of solenoid valves / limit switches
- Global accessory compatibility

7. Multifunction Position Indication System

- Visual open/close display
- NAMUR sensor mounting
- Low-cost automation integration
- Rapid field identification
- Precise valve position control
- Suitable for high-cycle operational valves

Technical Specifications

- Actuator Type: Double Acting / Spring Return
- Rotation Angle: 90° ($\pm 4^\circ$ adjustable)
- Air Supply Pressure: 2.5 – 8 Bar
- Mounting Standard: ISO 5211 / NAMUR
- Body Material: Extruded Aluminum Alloy
- Shaft Material: Carbon Steel / SS304 / SS316
- Temperature Range: $-20^\circ\text{C} \sim +80^\circ\text{C}^*$

*Optional seals available for extended ranges

Parts and Materials

Pneumatic Actuator Components List

Item No.	Part Name	Material	Qty	Item No.	Part Name	Material	Qty	Item No.	Part Name	Material	Qty

	160	

D O-Ring	E Number of Springs
R: Normal Temp: RT-NBR-70	04
L: Low Temp: LT-SL-70	05
H: High Temp: HT-FKM-75	06
	07
	08
Note:	09
Normal Temp: NBR(-15~+80°C)	10
Low Temp: Silicon(-40~+80°C)	11
High Temp: Viton (-15~+150°C)	12

Notes

- Standard rotation for both double acting and spring return types is clockwise to close.
- The standard operating temperature range for seals is -18°C to 80°C. For special environmental requirements such as high or low temperatures, seals made of corresponding materials can be selected.
- For high and low-temperature environments, Viton and Silicone O-rings are provided respectively, used in conjunction with special lubricants.
- For various parameters of standard products, please refer to the relevant sections of this manual. Our company can also provide special customized services based on standard products; please feel free to contact our sales engineers.
- All specifications can be provided with 304 or 316 stainless steel gear output shafts upon request.

Example Descriptions

< Example 1 > JEW-110-P-R

JEW is defined as the code for double acting, 110 is the cylinder pneumatic actuator model number, P is the code for air supply inlet/outlet specification PT(Rc) thread BSPT, R defines the applicable temperature range for the cylinder seals.

< Example 2 > JEV-095-G-R-08

JEV is defined as the code for spring return, 095 is the cylinder pneumatic actuator model number, G is the code for air supply inlet/outlet specification G thread BSPP, R defines the applicable temperature range for the cylinder seals, and finally select the required number of cylinder installation springs.
